CALCUTTA, THE 14TH AUGUST 1929.

RESOLUTION—No. 590REGN.

Read—

Paragraph 13 of resolution No. 1410T.R., dated the 24th September 1917, regarding the formation of the district advisory committees for selection of candidates for appointment as Muhammadan Registrars and Kazis.

Read—

Resolution No. 802Regn., dated the 24th April 1926, sanctioning the constitution of the existing permanent committee for the supervision of Muhammadan Registrars and Kazis for the Bengal Presidency.

Prior to 1918 there was a centralized permanent committee for the entire Province. Under rule I of the rules issued under notification No. 4000Regn., dated the 30th April 1918, local advisory committees were formed at the headquarters of each district other than Calcutta to assist the Registrar in selecting candidates for the posts of Muhammadan Registrars and Kazis. Under rule 3 of the said rules the functions of the permanent committee were restricted to those of an examining board or of an advisory body on general questions, and the bulk of its work in connection with the selection of candidates for the posts of Muhammadan Registrars and Kazis all over the Province (with the exception of Calcutta) was transferred to the district advisory committees.

It has been found, however, that the working of district advisory committees has not been entirely satisfactory, and after consideration, the Government of Bengal have decided to revert to the old system of having a centralized permanent committee for the whole Province and to abolish both the district advisory committees and the existing permanent committee. All questions of appointments of Muhammadan Registrars and Kazis which were hitherto being dealt with by the existing advisory committees will henceforth be dealt with by the permanent committee hereby constituted.

2. The permanent committee shall consist of five or more members appointed by the Local Government. Ordinarily the number of members should not exceed 12, but the Local Government shall have power to co-opt

one or two more, if necessary. The appointment of members of the committee will be notified in the *Calcutta Gazette*. The Inspector-General of Registration shall be the *ex-officio* President of the committee. Members shall hold office for a term of three years and shall be eligible for re-appointment on the expiry of the term.

3. The Government of Bengal are accordingly pleased to appoint the following members to constitute the first permanent committee mentioned above:—

The Inspector-General of Registration, Bengal, President (*ex-officio*).

Mr. A. F. Rahman, B.A. (Oxon.), M.L.C. (Jalpaiguri).

Nawab Khwaja Habibulla, M.L.C. (Dacca).

Khan Bahadur K. G. M. Faroqui, M.L.C. (Tippera).

Dr. A. Suhrawardy, Ph.D., M.L.A. (Midnapore).

Khan Bahadur Haji Khundkar Fazlul Haq, B.C.S. (retired) (Murshidabad).

Shams-ul-Ulama Khan Bahadur Dr. M. Hidayat Husain, M.A., Ph.D., Principal, Calcutta Madrasah (offg.).

Maulvi Agha Muhammad Kazim Shirazi (Calcutta).

Secretary, Central National Muhammadan Association (Calcutta).

Maulvi Abdul Karim, M.L.C. (Calcutta).

Maulvi Abdul Huq Dobash, Merchant (Chittagong).

Haji Chaudhury Muhammad Ismail Khan, M.L.A. (Barisal).

The duties and functions of the committee will be in accordance with the rules approved by the Local Government.

Order.—Ordered that this resolution be published in the *Calcutta Gazette*.

Ordered also that copies of this resolution be forwarded to the Inspector-General of Registration, Bengal, and to all District Registrars for information.

STATEMENT OF OBJECTS AND REASONS.

The present constitution of the Calcutta University is based mainly on Act VIII of 1904. This measure evoked a great deal of opposition at the time of its enactment. Since then, considerable progress has been achieved in all the branches of educational activity. The conditions in this province have also undergone change in various respects. It is now felt that the Indian Universities Act of 1904 is wholly unsuited to the needs of the present day. Evidence of this is furnished by the fact that it has been found necessary to amend the law relating to Universities in several of the provinces. It can hardly be denied that the existing constitution of the Senate of the University is not representative. The law provides for eighty per cent. of its members being nominated by the Chancellor. . Only ten per cent. of the total strength of the Senate is elected by the registered graduates. Even this limited right is, on account of the high fee payable for registration, availed of by a small proportion of the educated community. There is no scope for the adequate representation of the general public interested in education or of teachers in non-Government colleges and schools. This Bill seeks to remedy these defects. It also attempts to provide a constitution for the University which is calculated to enable this body to perform its functions independently of outside control and promote the best interests of the people of the province.

REVENUE ACCOUNT.

RECEIPTS.—The total receipts for the year are Rs. 51·73 lakhs against a budget estimate of Rs. 43·26 lakhs. The increase is due mainly to the receipts from terminal tax, duty on jute, municipal contribution and rebate of interest on debenture loans exceeding the annual budget estimate. There is also included a sum of rupees three lakhs representing appreciation on securities at 31st March 1928, for which no provision was made in the budget.

EXPENDITURE.—The expenditure for the year was Rs. 28·41 lakhs against a budget provision of Rs. 30·98 lakhs. The decrease of Rs. 2·57 lakhs is due to savings against the provision for expenditure on debenture loans, establishment, stamp duty, etc.

The closing balance on revenue account shows a surplus of Rs. 3,66,65,296-12-8 of which a sum of Rs. 2,85,10,169-8-6 has been spent on capital account to meet payments in excess of capital receipts. The net balance of Rs. 81,55,127-4-2 was held as follows:—

NOTIFICATIONS.

No. 31.—20th August 1929.—Babu Gyanendra Nath Chatterji, Assistant Engineer, is transferred, in the interests of the public service, from the Canals Division to the office of the Superintending Engineer, Southern Circle, where he will remain attached until further orders.

No. 32.—21st August 1929.—Mr. Indu Bhusan De, Assistant Executive Engineer, passed the Professional Examination held on the 26th July 1929.

No. 25-I.—23rd August 1929.—In exercise of the powers conferred by section 11 of the Canals Act, 1864 (Bengal Act V of 1864), and in supersession of the previous notification on the subject, No. 5, dated the 12th April 1915, the Governor in Council is pleased to make the following rules for the lines of navigation known as the Eastern Canals and the Outer Boat Route, as defined in notification No. 230, dated the 23rd July 1895, and for the navigable channels extending from Khulna in the district of Khulna to Magura in the district of Jessore as defined in notification No. 7, dated the 1st September 1914:—

Rules.

1. The Superintending Engineer, Southern Circle, may define the limits within which no loading or unloading of cargo from or to vessels or mooring of vessels shall be permitted. The prohibited reaches shall be notified by the supervisor of the channels by posting notices on sign-boards in the locality and also by beat of drum.

2. At places where mooring posts have been provided by the supervisor, vessels desiring to moor shall be made fast to such posts by the bow and stern in a single line along the banks or in such other manner as the supervisor may direct.

3. Vessels, while moored, should be kept as close to the banks as possible. As the water falls, the bow and stern ropes should be slackened and the vessels gradually pushed towards the centre of the channel. During flood tide vessels must be brought as close to the bank as possible.

4. While mooring at the tow-path side all vessels must lower sail and mast and must not erect any high pole, so that the towage of other vessels may not be obstructed.

5. In order to avoid collision or confusion, vessels waiting at the junction of two or more rivers for a favourable tide must be moored at a distance of not less than 1,000 feet from the point of junction.

6. No vessel or raft shall be moored in such a position or navigated in such a way as to endanger the safety or obstruct the passage of other vessels but must be so moored or navigated as prescribed by these rules or as directed by the supervisor of the channel or his assistants.

7. The supervisor may, by posting notices, prohibit the dropping of anchors or the erection of bamboos or poles in any part of the line of navigation.

8. No jetties, either permanent or temporary, for the purpose of loading or unloading cargo shall be constructed without the previous permission of the supervisor.

9. The supervisor, or an assistant authorised by him, may remove any vessel, anchor, pole, or any other thing which he may find in a position which is in contravention of rules 1 to 8 and may deal with them in such a manner as he thinks necessary.

10. Whenever a laden vessel is seized by the supervisor or by his assistants he shall give immediate notice of the same to the owner or his agent and require the removal of the cargo without delay, and shall warn him that he will be required to pay all expenses necessary for the proper custody and storage of the same.

11. Vessels plying in the narrow channels mentioned below shall not use sail:—

(*a*) Guntia Khali khal (in the reach, mile 68 to mile 72).
(*b*) Cut No. 2 (in the reach, mile 78 to mile 82).
(*c*) Baitaghata khal (in the reach, mile 102 to mile 107).
(*d*) Alaipur khal (in the reach, mile 121 to mile 130).
(*e*) Bemorta khal (in the reach, mile 136 to mile 143).
(*f*) Damodar khal (in the reach, mile 152 to mile 156).
(*g*) Banstoli khal (Outer Boat Route).

12. Where there is a tow-path on one bank only, vessels plying with the current shall keep to the opposite bank, and allow towage to those proceeding against the current.

13. No person is permitted to place any obstruction on the channel banks, roads, drains, canal side bridges, etc., which will impede a free passage along them, or cause injury to them, or to commit any nuisance, or to deposit any obnoxious material thereon or in the channel.

14. No person shall deposit goods of any description on the slopes of the channel between the water line and the high bank, without the previous permission of the supervisor except during the actual process of loading or unloading vessels.

15. All timber must be drawn up on to the bank well above the water.

16. No person shall wilfully or negligently allow a vessel to sink in any part of the line of navigation.

17. All vessels, whether travelling or moored in the channel, between sunset and sunrise, must carry a white light in a lantern on the fore-part of the vessel, where it can be distinctly seen from all sides. All steam-vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam-vessel, whether in motion or moored, shall carry the light prescribed in the first part of this rule. This rule does not apply to small uncovered dinghis, not exceeding 15 feet in length, while moored along the bank.

18. The supervisor may, by posting notices on sign-boards, specify a speed-limit for vessels in any reach.

19. *Wrecks.*—In the case of a wreck the supervisor or his subordinates shall offer every assistance in removing the same.

20. It shall be the duty of the supervisor to mark the wreck and to erect warning signals to avoid danger to navigation.

21. If, after seven days of the occurrence of a wreck, prompt measures are not taken by the owner to remove it from the line of navigation, the supervisor, after giving notice to the owner, may arrange for the removal of the same at the expense of the owner. Further, if a wreck obstructs the fairway, the supervisor may take action at once to remove the same and may incur whatever expense is necessary.

22. In the event of the salvage of a wreck being undertaken by the owner of the vessel, or by his agent, and of the obstruction not being removed within seven days, a fine not exceeding Rs. 5 per day for the period commencing from the 8th day of the wreck, or any other day specified by the supervisor, till the wreck is salved, shall be paid by the owner to the supervisor. If the fine be not paid by the owner or his agent, the vessel or any portion of the cargo may be seized by the supervisor and disposed of by sale as directed in section 9 of the Canals Act 5 of 1864.

23. When the supervisor or his assistants remove a wreck, they shall not be liable for any damage to the vessel or cargo, or for any loss before, or in the process of salvage done by them.

24. As soon as a wrecked vessel is salved by the supervisor or his staff, a notice shall be issued by him calling on those concerned to pay to the supervisor all the charges incurred by him on account of the salvage of the vessel or of removing or guarding the cargo under the following heads:—

(*i*) Actual cost of salving the vessel.

(*ii*) Cost of serving the notice.

(*iii*) Cost of removal, maintenance, custody and protection.

(*iv*) Godown charges.

In case of any dispute regarding such charges, the Executive Engineer concerned, on receipt of a written application from the owner of the vessel, shall decide the amount to be paid and his decision shall be final.

25. The vessel, or its cargo, shall not be handed over to the owner until the charges levied under rule 24 have been paid.

26. If, within fifteen days from the publication of a notice under rule 24, or in the event of an application to the Executive Engineer appealing against the notice within fifteen days of the date of the Executive Engineer's decision, the sum demanded be not paid, the vessel, its furniture and any portion of the cargo recovered, shall be sold by the supervisor, by public auction, and the proceeds dealt with in accordance with section 9 of the Canals Act 5 of 1864.

27. All notices under rules 21, 22 and 24 shall be issued in writing by the supervisor, and despatched in a registered cover to the owner of the vessel. If the owner be not known or cannot be traced, a general notice shall be posted on the notice board of the Executive Engineer's office. Also it shall be announced by beat of drum at the hat nearest to the place of salvage, and also by advertisement in at least one English and one vernacular Calcutta or local newspaper.

28. No officer of any description or rank employed on the canals shall, either directly or indirectly, bid for or purchase any article sold under these rules or under the provisions of the Act.

29. For any infringement of rules 1 to 8 and 11 to 18, the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 and to an additional fine not exceeding Rs. 5 for each day that the infringement is continued.

In the Court of the Commissioners appointed by Government Notification No. 15778 A., dated the 12th August 1929, under section 36(2) (a) and 38 of the Bengal Electoral Rules at Chinsurah, district Hooghly.

ELECTION CASE No. 1 OF 1929.

To (1) Moulvi Golam Rahman, Advocate by profession, at present residing at Chinsurah, district Hooghly, petitioner.

(2) Moulvi Abdul Karim of 13/2, Wellesley Square in the town of Calcutta, respondent.

PLEASE take notice that an election petition a copy whereof is enclosed herewith has been filed by Moulvi Golam Rahman against the election of Moulvi Abdul Karim in the Bengal Legislative Council for setting aside the aforesaid election and that the 3rd September next has been fixed for the return of the notices. The written statement, lists of witnesses and documents will be filed on that day. Both parties must be present on *that* day. The hearing of the case is fixed for the 18th September next. The trial will be held at Chinsurah in the Ejlas of the District Judge of Hooghly.

Given under my hand this 21st day of August 1929.

K. C. NAG, President.

To His Excellency Sir Francis Stanley Jackson, P. C., G.C.I.E., Governor of Bengal.

In the matter of an election petition under Part VII of the Bengal Electoral Rules and the Bengal Electoral Regulations

and

In the matter of the election to the Bengal Legislative Council from the Burdwan Division South Muhammadan Constituency held on the 1st and the 5th June, 1929

and

In the matter of Golam Rahman, of Beleswar, post office Panchpara, district Hooghly, by profession Advocate, at present residing at Chinsurah, district Hooghly, petitioner

versus

Abdul Karim of 13/2, Wellesley Square in the town of Calcutta, respondent.

The humble petition of Golam Rahman of Chinsurah, district Hooghly, abovenamed.

Most respectfully sheweth :—

1. That your petitioner was a candidate for election to the Bengal Legislative Council from the Burdwan Division South Muhammadan Constituency aforesaid, at the last general election held in the said Constituency on the 1st and the 5th of June, 1929, the aforesaid Abdul Karim the respondent being the only other candidate.

2. That upon the counting of votes by the Returning Officer, the said respondent Abdul Karim was declared duly elected as having obtained the largest majority of votes and his name has since been published as such in the *Calcutta Gazette*.

3. That the voting as declared by the Returning Officer was as follows :—

	Votes.
Abdul Karim	991
Golam Rahman	877
Rejected	200

4. That the said majority was obtained by reason of the improper rejection of 153 votes which had been duly and validly given in your petitioner's favour, by the Returning Officer.

5. That it appeared at the counting of votes held by the Returning Officer on the 13th of June, 1929, that the said 153 votes had been polled at the Pandua polling station and the electors at that centre had duly and validly placed their marks against your petitioner's name on the ballot papers and the said electors had done nothing which was either prohibited by Bengal Election Rules and Regulations or which was contrary to the general principles of the law of the ballot.

6. That it further appeared at the said counting of votes that the Presiding Officer at the said Pandua polling station had made an endorsement on each of the ballot paper issued by him, indicating the polling station, the name of the Constituency and the elector's number on the Electoral Roll which were contrary to the instructions given to him by the Returning Officer, and were gratuitous and illegal.

7. That the said Presiding Officer at the Pandua polling station made the said illegal endorsements on the ballot papers inspite of the protest of your petitioner's polling agent there not to make such entries on the ballot papers.

8. That the said wrongful and illegal conduct of the Presiding Officer at the Pandua polling station had, in the opinion of the Returning Officer, the effect of identifying the electors concerned and he, the Returning Officer, rejected the said 153 votes of your petitioner and 9 such votes polled by the said respondent.

9. That the said rejection of the 153 votes of the Pandua polling station by the Returning Officer is improper inasmuch as the said ballot papers, *prima facie*, do not identify the electors concerned and that neither the said electors nor your petitioner had done anything to invalidate the said 153 votes, and the said improper rejecton has materially affected the result of the election as has been held by the Returning Officer in his order dated the 13th of June, 1929.

10. That in the premises aforesaid your petitioner submits that the election of the said respondent has been null and void and should be set aside and that your petitioner should be given credit of the said 153 votes polled at the Pandua polling station and as such he is entitled to be declared elected as having obtained a majority of the votes polled.

11. That the said respondent submitted his return of election expenses on the 13th of July, 1929.

12. That your petitioner has deposited herewith a sum of rupees one thousand only as security for costs under rule 35 of the Bengal Election Rules.

Wherefore your petitioner prays that it may be determined that the said respondent Abdul Karim was not duly elected or returned, and that your petitioner was duly elected and ought to have been returned or that a fresh election of the above Constituency be declared upon the existing nominations and your petitioner be awarded full costs of this petition.

VERIFICATION.

I, Golam Rahman, the petitioner abovenamed, hereby state that the statements in paragraphs 1 to 9 are true to my knowledge and the statements made in paragraphs 10 to 12 are true to my information which I believe to be true. This verification is signed by me at the High Court, Calcutta, on the 20th July, 1929, at 1 p.m.

III of 1923. III of 1884.

STATEMENT OF OBJECTS AND REASONS.

The Calcutta Municipal Act, 1923, as it was originally framed, did not include in its local extent the Cossipur-Chitpur area, and the Bill even when it emerged from the Select Committee did not include that area. This area was amalgamated with Calcutta in the teeth of vehement opposition by the rate-payers and against the deliberate and considered recommendations and opinions to the contrary made and given by the Amalgamation Commission appointed by Government, the then District Magistrate of 24-Parganas, and the Commissioners of the old Cossipur-Chitpur Municipality. The motion for amalgamation was carried by a very narrow majority in the Bengal Legislative Council, even the Hon'ble Minister in charge of the Bill voting against the same. It was generally thought that the step of increasing the liabilities and obligations of the Corporation of Calcutta by adding to the already extensive city the aforesaid vast area of Cossipur-Chitpur, covering more than four square miles and comprising many mills, factories and business houses, was a menace to the health and population of the city. Even before the amalgamation of that area, the Corporation of Calcutta was not in a position to meet its statutory obligations as regards the city proper in a satisfactory way. And this has been much more the case after the amalgamation, as it was bound to be, both in respect of the city proper and the said added area ; and the position has been rendered worse on account of the financial difficulties of the Corporation. For this reason, many good schemes have either been abandoned or postponed, and there is very little hope of the said schemes being ever carried out if the aforesaid vast area is any longer kept within the limits of the Corporation of Calcutta. On the other hand, the people of the said added area, will not certainly for many years to come enjoy the amenities which are now being enjoyed by the residents of the city though the former have been called upon to pay rates and taxes many times more than their former assessment, ignoring the salutary provision made by the Legislature for levying a lower and progressive rate under section 7 of the Calcutta Municipal (No. II) Act, 1923, thus causing much dissatisfaction amongst the rate-payers of that area, notwithstanding the partial reduction of valuation of holdings made in some cases by the Chief Executive Officer in the exercise of his powers under section 146 of the Calcutta Municipal Act, 1923. Moreover, the administration by the Corporation of Calcutta is costlier than that by the old Municipality, which was commended in successive Government annual reports, and under which the people enjoyed many privileges and facilities of which they have now been deprived. In fact, there was no case made out for amalgamating the said area with Calcutta by abolishing a flourishing and popular Municipality which effected considerable improvements in every direction within the said area, and had a combined surface drainage and sewerage scheme and other important schemes ready for being taken up, though it derived a much lower income by taxation under the system provided for in the Bengal Municipal Act, 1884.

Most of the above reasons also apply to the case of the Garden Reach area, which comprises nearly 4½ square miles and is mostly undeveloped and consists extensively of jungles, ditches, tanks and paddy lands without lights, filtered water, roads or drains. Most of the inhabitants of this area are very poor and they can ill-afford to pay the exorbitant taxes imposed upon them by the Corporation of Calcutta, as a result of which their goods have been seized under distress warrants and many of them have been rendered homeless. Owing to their inability to pay taxes, almost all the inhabitants have been disenfranchised ; where there were nearly 600 Muhammadan electors before, there were less than 50 at the last General Election.

It will be remembered that a Bill with the same object as the present one was introduced by Dr. Suhrawardy and passed by the Legislative Council on the 18th August, 1926, but the same was not assented to by the then Governor of the Province. But in his letter to Dr. A. Suhrawardy His Excellency, observed : "It will be always open to the next Council, should they desire to do so, to consider at leisure a fresh Bill with the same object." The present Bill is introduced with necessary amendments, and it is hoped that the present Council will extend to it the same sympathy and support as was given by the Council to Dr. A Suhrawardy's Bill.

And it may also be mentioned that a similar Bill was introduced by Rai Harendra Nath Chaudhuri in the last Council on the 14th December, 1927, but the same lapsed owing to the fact that no opportunity was found to move the second reading thereof during the next two sessions.

CALCUTTA, *the 23rd August 1929.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 21st August 1929.

Summary.—During the week light rainfall was general throughout the Presidency. More rain is needed for the transplantation of winter paddy seedlings especially in parts of West and North Bengal. The state and prospects of standing crops are generally satisfactory. The average price of common rice for the province has risen by about 0·12 per cent. as compared with that of the previous week.

Midnapore.—No. 11117L.A.—22nd August 1929.—The following agreement is published under section 42 of the Land Acquisition Act, I of 1894, for general information:—

Agreement.

Memorandum of agreement made this 21st day of August 1929, between the Midnapore Central Co-operative Bank, Limited, a registered society within the meaning of the Co-operative Societies Act, 1912 (II of 1912), and having its registered office in the town of Midnapore (hereinafter called the society) of the one part and the Secretary of State for India in Council (hereinafter called the Secretary of State) of the other part.

Whereas, for the purpose of the construction of an office building, officers' quarters and other necessary out-houses for the Midnapore Central Co-operative Bank, Ltd., the society has applied to the Government of Bengal for the acquisition under the provisions of the Land Acquisition Act, I of 1894, of the piece or parcel of land containing 0·31 of an acre or thereabout situate in the town of Midnapore in the district of Midnapore and more particularly described in the schedule hereto and delineated in the plan* hereunto annexed.

And whereas the said Government of Bengal, being satisfied by an enquiry held under section 40 of the said Act that the proposed acquisition is needed for the aforesaid purpose and that the said work is likely to prove useful to the public, has consented to acquire, on behalf of the society, the piece or parcel of land hereinbefore described.

* Not printed herewith but may be inspected in the office of the Collector of Midnapore.

And whereas the said Government of Bengal has required the society under the provisions of section 41 of the abovementioned Act to enter into the agreement with the Secretary of State hereinafter contained. Now this Indenture witnesseth that it is hereby agreed and declared as follows:—

1. On demand the society shall and will pay to the said Government of Bengal all and every compensation in respect of the said land tendered, paid or awarded or to be tendered, paid or awarded by the Collector under the Land Acquisition Act, 1894, or by the Court to which a reference under part III of the said Act may be made, or by the Court or Courts to which an appeal from the award of the said Court may be preferred and all costs, charges and expenses of the proceedings in the aforesaid Courts, or otherwise incidental to the proposed acquisition or payable in respect thereof under the provisions of the said Act.

2. On demand made by the said Collector the obligations of the society under the last preceding clause not being thereby limited, the society shall and will deposit with the said Collector such sum or sums of money as in his discretion the said Collector may in anticipation estimate to be necessary for the purposes mentioned in the last preceding clause.

3. On payment by the society of all demands under the foregoing first clause, or, in the discretion of the said Government of Bengal (on deposit by the society of all estimated amounts as provided in the second clause), but not before possession shall have been taken under the provisions of the abovementioned Act, the Secretary of State shall make over possession of the said land to the society and shall execute and do all such acts and deeds as may be necessary and proper for effectually vesting the same in the society.

4. The said land shall be held by the society for the purposes of its office buildings, officers' quarters and other necessary out-houses as is hereinbefore mentioned and without the sanction in writing of the said Government of Bengal first had and obtained for no other purpose whatsoever.

5. The said office buildings, officers' quarters and other necessary out-houses shall be completed (and fully equipped in all respects ready for use) within one year from the date on which possession of the said land shall have been given to the society.

7. On taking such possession the said Government may sell or otherwise deal with the said land and buildings as it may think proper.

(i) Should the said Government sell the land with the buildings the said Government after deducting the expenses incurred in connection with the said taking of possession and with such sale shall pay the proceeds to the society.

(iii) Should the said Government decide to sell the buildings only upon such sale the Secretary of State after deducting the expenses of taking possession and selling, pay the balance of the proceeds of sale to the society, together with the sum received from the society in respect of compensation for the land (less the statutory allowance of 15 per cent. and less any amount received from the society on account of trees and buildings which are not in existence at the time of resumption) but will not repay any sum paid and received on account of costs, charges and expenses.

8. The public shall be entitled to use the said land and buildings subject to the laws and rules governing co-operative societies and to the bye-laws of the society.

FINANCE DEPARTMENT.

RESOLUTIONS.

Simla, the 12th August 1929.

SUBJECT:—*General principles applicable to contracts involving expenditure from the central revenues.*

No. F. 22-XII-Ex. II/27.—The Governor-General in Council has had under consideration the question of regulating the powers of subordinate authorities to enter into contracts or agreements involving expenditure from the central revenues. Detailed rules exist on the subject in the various departmental codes, and orders have also issued from time to time defining the powers of various authorities in such matters. From cases that have come to the notice of the Governor-General in Council, it would appear that the principles underlying these rules have not invariably been observed in practice. The Central Public Accounts Committee drew attention to the question in paragraph 49 of their report on the Appropriation Accounts for 1923-24, and again in paragraphs 18, 13 and 27 respectively of their reports on the Appropriation Accounts for 1924-25, 1925-26 and 1926-27; and the matter was briefly dealt with in paragraphs 27, 10 and 9 respectively of the Finance Department Resolutions Nos. D./1089-A., dated the 1st June 1926, D./1163-A., dated the 5th May 1927 and D./1407-A., dated the 17th May 1929. The Governor-General in Council considers that the general principles underlying the departmental rules and orders should be re-stated in a comprehensive form. He is accordingly pleased to enunciate the following fundamental principles for the guidance of authorities who have to enter into contracts or agreements:—

(1) The terms of a contract must be precise and definite, and there must be no room for ambiguity or mis-construction therein.

(2) As far as possible, legal and financial advice should be taken in the drafting of contracts and before they are finally entered into.

(3) Standard forms of contracts should be adopted wherever possible, the terms to be subject to adequate prior scrutiny.

(4) The terms of a contract once entered into should not be materially varied without the previous consent of the competent financial authority.

(5) No contract involving an uncertain or indefinite liability or any condition of an unusual character should be entered into without the previous consent of the competent financial authority.

(6) Whenever practicable and advantageous, contracts should be placed only after tenders have been openly invited, and in cases where the lowest tender is not accepted, reasons should be recorded.

(7) In selecting the tender to be accepted the financial status of the individuals and firms tendering must be taken into consideration in addition to all other relevant factors.

(8) Even in cases where a formal written contract is not made, no order for supplies, etc., should be placed without at the least a written agreement as to price.

(9) Provision must be made in contracts for safeguarding Government property entrusted to a contractor.

(10) The Auditor General and under his direction, other audit authorities have power to examine contracts and to bring before the Public Accounts Committee any cases where competitive tenders have not been sought, or where high tenders have been accepted, or where other irregularities in procedure have come to light.

These principles will apply to all contracts involving expenditure from central revenues, and the Governor-General in Council, trusts that they will be carefully observed by all officers who have to enter into such contracts on

behalf of Government. The **existing detailed** rules and regulations on the subject will be examined by the Departments concerned with a view to bring them into conformity, as far as possible, with these principles. In cases where no code or manual of instructions relating to contracts exists at present, steps should be taken at once to supply the deficiency by preparing a manual which will give effect in detail to the principles stated in this Resolution.

ORDERED that the Resolution be published in the *Gazette of India*.

RESOLUTION ON THE REPORT ON THE POLICE ADMINISTRATION IN THE BENGAL PRESIDENCY FOR THE YEAR 1928.

GOVERNMENT OF BENGAL.

Police Department.

CALCUTTA, THE 27TH AUGUST 1929.

RESOLUTION—No. 3611 Pl.

Read—

The Report on the Police Administration in the Bengal Presidency for the year 1928.

Mr. A. E. O'Sullivan officiated as Inspector-General of Police throughout the year except between the 15th June and the 27th October when Mr. T. J. A. Craig officiated in the appointment.

2. **Eastern Frontier Rifles.**—The battalion again proved itself to be of the greatest value as a highly efficient provincial reserve force from which detachments could be found when disorder on a large scale had broken out or was threatened and the ordinary district or city police required reinforcements and stiffening. The Governor in Council agrees with the Inspector-General that on such occasions all ranks discharged their duty in circumstances which involved the severest strain with a degree of forbearance which reflects the greatest credit on the quality of their training under Lieutenant-Colonel Macpherson and Major Dallas Smith.

The pay of the non-commissioned officers and men of the battalion was raised with effect from the 1st November 1928. In order to induce trained men to remain in the Battalion as long as possible, a new element of pay was introduced in the shape of deferred pay at the rate of Rs. 2 per mensem payable on retirement to men of not less than eight years' service with effect from the beginning of the fifth year of service.

3. **Recruitment and health of the Civil Police.**—In reviewing the Report on the administration of the Police in Calcutta for 1928, the Governor in Council remarked that it was too early to judge the permanent effect of the recent increase in the pay of constables and other subordinate ranks. The same remark applies to the Police Force in the rest of the Presidency, but His Excellency in Council observes that the number of recruits who resigned while under training fell from 237 in 1927 to 60 in 1928, while the percentage of casualties under all heads fell from 11·3 to 8·2, the lowest figure recorded since 1922. It is also interesting to note that at the end of 1928 there were about 800 more constables of over ten years' service in the force than there were at the end of the previous year. If the tendency indicated by these figures continues, considerable saving of expenditure should be effected through the elimination of the great waste involved by the presence in the force of large numbers of untrained or inefficiently trained recruits and of men rendered ineffective by illness consequent on under-nutrition and inadequate leave. That the amount of waste owing to sickness is not negligible is seen from the fact that, according to the estimate of the Inspector-General, the State had to spend during 1928 the sum of Rs. 1,89,000 on the pay of men who were in hospital or confined to barracks through illness.

The Governor in Council regrets that financial conditions make it impossible at present to take further steps for the conservation of man power by providing decent housing and hospital accommodation. As in the case of the Calcutta Suburban Police, the formulation of a building scheme to be financed by loan has had to be postponed.

4. **Discipline.**—It is satisfactory that the Inspector-General is able to report a decrease from 90 to 53 in the number of judicial punishments and from 11,704 to 10,803 in that of punishments imposed in departmental proceedings. There has also been a big decrease in the number of criminal complaints brought against police officers and men. Including cases pending from the preceding year 383 such complaints were instituted in 1928 as against 419 in 1927 and 464 in 1926. Out of 333 cases disposed of during the year 171 or over 51 per cent. were dismissed summarily, 125 or about 37 per cent. resulted in acquittal, while only 37 or just over 11 per cent. ended in conviction. The Governor in Council has again to express regret that few prosecutions were launched against persons whose complaints against police officers

appeared to be maliciously false. He realises that it is difficult to secure a conviction in a case where it is incumbent on the prosecution to prove a negative, and that consequently police officers are reluctant to institute prosecutions, but the extent of the danger to which police officers in the mufassal are exposed by reckless and malicious accusations and the consequent reaction on their work makes it important that a falsely accused officer should in as many cases as possible move the Magistrate to take action against the complainant and that in the event of the conviction of the latter the public prosecutor should press for exemplary punishment.

5. **Crime Statistics.**—The number of cognizable cases reported (92,025) was about 500 higher than in 1927 and about 3,000 higher than in 1926. On the other hand, the 1928 figures are lower than those for any of the years 1922 to 1925, while the number of true cases of serious crime decreased by about 340 to 43,966, the lowest figure recorded in the last seven years except in 1926. The number of cases of theft is 15,699, the lowest recorded since the reconstitution of the province in 1912; as compared with 1927 burglaries show an increase of 219 to 24,584 which is also higher than the number in 1926 but lower than those recorded between 1912 and 1925. Dacoities, of which there were 802, show an increase as compared with any year since 1912 except 1922, 1923 and 1924. It is a striking feature of crime statistics that while in 1927 the number of dacoities was only one-fourth of what it was in 1928 (201 as against 802) there were in the former year 4,000 more burglaries and 2,000 more thefts. The Governor in Council would be glad if in his next report the Inspector-General would state what he believes to be the reason for this.

There was an increase in the percentage of decided police cases ending in conviction and, as will appear from paragraph 28 of the Inspector-General's report, Bengal again compares favourably with other provinces in this respect.

In his review of the Report for 1927, the Governor in Council referred to the delay in the disposal of cases brought to trial, and while he notes that there has been further decrease in the percentage of cases disposed of in two hearings, he regrets that there has been a further increase in the number of cases remanded more than six times. Unfortunately it has not been found possible to provide funds for an adequate increase in the number of magistrates, though a beginning will be made during the current year. The changes of procedure introduced by the amendment of the Criminal Procedure Code in 1923 have increased opportunities for obstruction, and there is a real danger that action by a magistrate to avoid delay, such as ruling out irrelevant evidence, may be used by one of the parties to the case as a pretext for recourse to tactics which make delay inevitable. The device adopted is to give notice under section 526 of the Criminal Procedure Code of an intention to move the High Court to transfer the case to another court. Under the law as it now stands, the hearing of the case must be stopped at once and an adjournment of sufficient length to enable the party concerned to apply to the High Court must be allowed. At the end of paragraph 31 of his Report, the Inspector-General has quoted a number of instances where the obvious purpose of notice given was simply to gain time in order to defeat the ends of justice. When out of sixty-nine instances application to the High Court was made in only eight and that without success—it seems clear that the section is being used in a way which the Legislature could not have contemplated and that some amendment is called for.

6. **Criminal Tribes.**—The Governor in Council observes with interest that there is a consensus of opinion among Superintendents of Police that the Criminal Tribes Act serves a useful purpose in facilitating the control of active criminal gangs.

He is watching with interest the experiment now being made at Nilphamari to bring up children of the Karwal Nats now settled at Saidpur away from the evil influences of the elder members of the tribe. This experiment encourages stronger hopes of effecting real reformation of the tribe than any of the methods hitherto tried. The Governor in Council has recently had under consideration a proposal that the incorrigible members of the tribe should be completely segregated but he regrets that he has so far been unable to find any practicable means of giving effect to it.

7. **Village Police and Police Work of Union Boards.**—His Excellency in Council observes with regret that there has been no general improvement in the working of the rural police, but he is glad to note that instances have not been wanting in which union boards have co-operated with the regular police. In order that such co-operation may become general, it is incumbent on all police officers from the thana officer upwards and on district and subdivisional magistrates and circle officers to let union boards know what is wanted of them in preventing and detecting crime, and to help them to realise their responsibilities and the importance to themselves of an efficient village police. The remarks of the Deputy Inspector-General, Dacca Range, in his report about his visit to the office of the Manikganj union board suggest lines along which Government officers and other union boards might work.

8. **Commendation of officers.**—His Excellency in Council has read with pleasure the names of officers of whose good work the Inspector-General desires to make special mention. Among those officers are Mr. Sturgis and Captain Christie who were severely criticised by the District Magistrate of Howrah in the course of a judicial order on a complaint arising out of the riot at Bamangachi on the 28th March 1928 during the strike of East Indian Railway workshop employees. The Governor in Council examined the evidence on which these criticisms were based and was satisfied that they were not justified. He came to this decision in July 1928, but has so far been prevented and is still prevented from publishing the reasons for this conclusion as cases in the criminal courts in connection with the incident are still pending.

As Mr. O'Sullivan who has officiated as Inspector-General for about two years and a half is about to proceed on leave preparatory to retirement after 34 years' service in the Indian Police, the Governor in Council takes this opportunity of recording his appreciation of his services. By the departure of Mr. O'Sullivan, Government will lose a valuable officer, the public a servant who has worked hard to bring about a better understanding between the police and themselves, and the Police Force an Inspector-General who has spared no effort to promote the well-being of his subordinates.

ORDER.—Ordered that copies of the resolution be forwarded to the Inspector-General of Police, Bengal, the Commissioner of Police, Calcutta, and all Commissioners of Divisions, for information.

Ordered also that the resolution be published in the *Calcutta Gazette*.

8 Durwans.	1 Head Gardener.
20 Keepers.	2 Cartmen.
14 Gardeners.	1 Syce.

1 Carpenter.	

Throughout the year under review the standard of the collection and of the Garden has been maintained as regards both number and variety of exhibits. The collection has been added to from time to time by gifts, exchanges and purchases and the condition of the animals and birds has been good throughout the year. The only exception was an outbreak of septicæmia among newly-purchased monal and tragopan pheasants and chakar partridges, shortly after their admission into the Garden, with the result that all were lost. Fortunately however this did not spread as the birds were still in the segregation cages allotted to new arrivals, and the epidemic may have originated before their admission into the Gardens.

It is to be regretted that the destruction of the trees on the Island by the Orang-outang necessitated their removal to their former cage. The exhibit was a great attraction but the depredations were at a rate greater than that at which nature could restore them and no means of checking them could be devised. The Gibbons, however, remain to delight visitors with their exhibitions of gymnastics.

The following structural improvements were undertaken during the year:—

(1) *Boundary wall round the Begunbari lands.*—To afford protection to the Garden property lying on the opposite side of the main entrance gates and consisting of the store godown, servants' quarters, segregation shed and vegetable garden, the area which was formerly insufficiently protected by wire netting has been enclosed by a brick wall 7 ft. high. This has enabled the vegetable garden to be considerably improved and larger quantities of fresh green food for the collection are obtained than formerly was possible. The unfiltered water service has been greatly improved by the substitution of bigger pipes and by the extension of the service.

(2) *The extension of the new Pheasant Enclosure.*—To provide additional accommodation for the increasing number of pheasants, the existing pheasant enclosure was extended to the east. The new and old buildings are continuous and the cages are all uniform.

There are now twelve cages in all and this has enabled different species to be kept apart in pairs, with the result that for the first time several pairs have bred in the Garden.

(3) *The Goral Enclosure.*—The rockwork in the Goral Enclosure has been greatly enlarged and extended. The position of the surrounding fence has been altered so as to increase the accommodation inside the enclosure.

(4) "*The Hermitage*".—The condition of this old building, the residence of the Honorary Secretary, was found to have become unsound through age. It was accordingly examined and a number of beams and burgahs have been changed and the interior of the house has been colour-washed and thoroughly repaired.

The unhealthy condition of the servants' quarters, owing to the absence of proper drainage, engaged the attention of the Committee, and a 2 feet wide pucca surface drain has been provided.

The electric installation in the Superintendent's quarters required renewal which has been done. The wiring in the Office has also been renewed and conduit pipes have been substituted as a precaution against fire.

Greater attention was paid to the annual repairs of the Garden. The following buildings were extensively repaired and repainted during the year:—

Entrance Lodge and Office, Sonebursa Enclosure, Central Monkey House, Marsupial House, Gubbay House, Murshidabad House, Jhind House, Schwendler House, Drill and Mandrill House and Indian Refreshment Pavilion.

The following houses were also repaired by iron and woodwork being renewed:—

Dumraon House, Reptile House, Small Carnivora House, Burdwan House, Sarnomoyi House and Refreshment Pavilion.

In addition the usual minor repairs and renewal work were executed and many roads and paths were thoroughly repaired and put in proper condition.

The Garden has been fully kept up throughout the year. The lawns and paths are in good order and the show of flowers has been much appreciated by the public. The Garden was awarded prizes at the Agri-Horticultural Society's Flower Show held in February 1929.

The financial condition of the Garden, notwithstanding heavy expenditure on unforeseen original works, *e.g.*, extension of the pheasant enclosure, boundary wall, etc., which were not provided for in the Budget Estimate for the year under review, may be considered as satisfactory. Though the daily receipts show an increase, strict economy had to be observed for the margin between income and expenditure is none too great for an undertaking such as that of the Zoological Garden if the standard of the collection is to be maintained and the exhibits are to be properly housed. With the permission of the Committee, a private exhibitor was allowed to exhibit a "white" elephant in the Gardens for three months ending in August, when his exhibit unfortunately died. To this, the increase in the number of visitors may in some measure be attributed.

The following is a comparative statement of visitors and receipts for recent years:—

		Number of visitors.	Receipts.
			Rs. A.
1925-26	...	1,030,647	72,500 10
1926-27	..	826,211	58,486 4
1927-28	...	1,107,161	76,701 2
1928-29	...	1,136,910	78,333 0

A large number of children under four years of age and school children, attended by their teachers, were admitted free. On the occasion of the Fancy Fair on 31st December 1928 and 1st January 1929, 14,813 people visited the Garden.

In addition, 50,199 persons visited the Garden on free days. A detailed statement of the number of visitors and receipts appears in Appendix B.

The thanks of the Committee are due to those ladies and gentlemen who have added to the zoological collection by donations, a list of which is given in Appendix C. Thanks are also due to those who kindly offered to present animals to the Garden, but whose offers could not be accepted, either because the particular species was already sufficiently well represented or owing to want of accommodation.

The Committee also desire to express their thanks to the following Railway and Steamer Companies for kindly conveying the animals belonging to the Gardens free of charge:—

E. I. Railway, B.-N. Railway, B. I. S. N. Co., Ld., P. & O. S. N. Co., through Messrs. Mackinnon, Mackenzie & Co. and R. S. N. Co., Ltd., through Messrs. Macneill & Co. and Messrs. Hoare Miller & Co.

The Corporation of Calcutta sanctioned a grant of Rs. 26,233-6-0 to the Garden for the year under report, and the amount of the rate bills in respect of the Garden was adjusted against the sanctioned grant as the rate bills fell due. The Committee desire to take this opportunity of expressing their thanks to the Corporation of Calcutta for their generous contribution to the funds of the Garden.

Thanks are also due to the Officer Commanding and Officers of the 3rd Battalion, 12th F. F. Regiment, stationed at Alipur, for permitting their regimental band to play at the Garden on Tuesday afternoons free of charge.

The Committee are much indebted to those members of the public who send old and broken-down horses to the Zoological Gardens, where they are disposed of under the most humane conditions.

P. L. BUCKLAND,
President.

E. H. MARSHALL,
Honorary Secretary.

Remarks.

The normal surplus shown in column 20 does not represent the true financial position for the following amongst other reasons :—

Firstly the computation of the normal surplus from the difference of the actuals of the ordinary income and of the ordinary expenditure on the average of the past three years is far from correct, in view of the fact that the demand is enhanced every year as a result of re-assessment of two wards by rotation and necessarily the collections have a tendency of upward movement.

Secondly, the sum of Rs. 68,728 collected by the evening of the 28th March 1929 could not be lodged in the Imperial Bank of India for credit to municipal fund owing to the bank having remained closed from the 29th March 1929 and the 1st April 1929 on account of the Easter holidays. The average ordinary income would have been raised by Rs. $\frac{68,728}{3}$ or Rs. 22,909 and the surplus by the like amount had not the holidays intervened.

Thirdly, the scheme to be financed by the loan is calculated to give a better supply of water which will enable the Commissioners to include almost the whole town within the water radius, thus causing an appreciable rise in the revenue.

Fourthly, the post of the Sanitary Superintendent was abolished from 1st January 1929, resulting in an annual saving of Rs. 7,800. The figures for 1928-29 could not make for more than two months' savings.

Then again by the freer use of the summary process prescribed by the Bengal Municipal Act availed of by the present body of the Commissioners, much improvement in the collection of rates and taxes is expected. In addition, an experiment is being made of an expedient for replacing man-power by mechanical devices in the matter of transit of night-soil. This, it is expected, will effect a great saving in the working expenses of the latrine fee fund, reflecting a much stronger position of the said fund.

RESOLUTION ON THE TRIENNIAL REPORT ON THE ADMINISTRATION OF THE REGISTRATION DEPARTMENT FOR THE YEARS 1926, 1927 AND 1928.

EDUCATION DEPARTMENT.

Registration.

CALCUTTA, THE 6TH SEPTEMBER 1929.

RESOLUTION—No. 709 REGN.

Read—

The Triennial Report on the Administration of the Registration Department for the years 1926, 1927 and 1928.

The late Khan Bahadur Aminul Islam was in charge of the Registration Department up to the 12th July 1926, when he fell ill and subsequently died on the 5th August 1926. Khan Bahadur Qurbanullah, the late Registrar of Assurances, Calcutta, acted in the post of Inspector-General till he was succeeded by Rai J. N. Ray Bahadur, I.S.O., who was appointed permanently to the post on the 23rd October 1926, and continued in charge of the department for the rest of the triennium.

2. During the period under review the following changes were brought about in the administration of the Registration Department.

In September 1927, the Inspector-General was vested by Government with powers under rule XIII of the rules made by the Secretary of State in Council under sub-section *(2)* of section 96B of the Government of India Act, in regard to Sub-Registrars, Sadar Sub-Registrars, the Sub-Registrar of Calcutta and the Inspector of Registration offices. The Inspector-General of Registration can now censure, withhold promotion from, reduce to a lower post, suspend, remove or dismiss any of the officers mentioned above. Similar powers were also delegated to the Inspector-General in regard to ministerial officers attached to his office. The Local Government are now the appellate authority in each of the above cases. In regard to ministerial officers attached to the several Registration offices, District Registrars have been vested with the powers of censuring, withholding promotion from, suspending, removing or dismissing them; appeals from the orders of the Registrar lie to the Inspector-General.

3. An improvement in the remuneration of the extra copyists of the department was effected during the period under review. After consideration of the proposals put forward in 1921 for an increase in the rates of remuneration which were ten annas eight pies per 3,000 words copied in Sadar Registration offices and 3,600 words in mufassal Registration offices, it was ordered by Government that payment to extra copyists should be made at the rate of Re. 1-4 per 3,000 words in the Calcutta Registration office and Re. 1 per 3,000 words in all other Registration offices.

4. The ordinary work of the department showed an increase for the whole triennium. The number of offices rose from 408 to 418. Compared with the preceding triennium compulsory registrations affecting immovable property increased by 5·9 per cent. and optional registrations decreased by 5·1 per cent. Other registrations, which include all registrations not affecting immovable property, wills and written authorities to adopt, increased by 4·1 per cent. during the triennium under review. The total number of registrations in books 1, 3 and 4 during the triennium under review was 5,796,589, against 5,493,079 in the preceding triennium, showing an increase of 5·5 per cent. The receipts of the department during the past three years amounted to nearly Rs. 119 lakhs and the expenditure to about Rs. 57¼ lakhs, leaving a surplus of nearly Rs. 61¾ lakhs. Compared with the previous triennium the receipts increased by 42·4 per cent., expenditure by 10·6 per cent. and the surplus by 94·3 per cent. The increase in receipts and in surplus is due to the increase in registrations and in the rates of registration fees which took effect from the 1st June 1925.

5. In the resolution on the preceding triennium's work, reference was made to the great need for suitable buildings for registration offices and quarters of Sub-Registrars, but owing to lack of funds little progress was made in the construction of urgently needed buildings during the period under review. For the same reason proper provision for record room racks and binding could not be made.

6. The total number of appeals under section 72 of the Indian Registration Act, XVI of 1908, and applications under section 73 of the Act disposed of during the triennium was 5,846 against 5,613 in the previous triennium, while the number of prosecutions under section 83 of the Act for offences under section 82(*a*) to (*d*) of the Act was 100 against 59 in the previous triennium. In connection with the cases disposed of, 78 persons were punished for making false statements and for false personation and its abetment.

7. As there is now only one Inspector of Registration offices for the whole of Bengal, he was only able to inspect selected offices. He made 158 inspections during the triennium under review. District Registrars, including District Officers, made 493 inspections during the period under review against 502 inspections made in the previous triennium. Inspections made by Sadar Sub-Registrars and Subdivisional Officers increased during the triennium. With the gradual increase in the volume and complexity of registration work, specially in view of the introduction of the Bengal Tenancy (Amendment) Act, IV of 1928, more inspection may be necessary; but it is now too early to form an idea of the increase that may be required.

8. His Excellency the Governor desires to acknowledge, with thanks, the efficient administration of the department by Rai J. N. Ray Bahadur, I.S.O.

ORDER—Ordered that a copy of this resolution be forwarded to the Inspector-General of Registration, Bengal, for information.

Ordered also that a copy of the resolution, together with the report, be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*.

By order of the Government of Bengal,

A. J. DASH,
Secy. to the Govt. of Bengal.

Annual Report of the Royal Botanic Gardens and the Gardens in Calcutta and of the Lloyd Botanic Garden, Darjeeling, for 1928-29.

ROYAL BOTANIC GARDENS.

1. **General.**—For horticultural operations the season just passed may be described as favourable. There was a period of prolonged drought towards the end of the year, but no permanent ill effects were visible from it, and at the time of writing this the garden is once more clothed in all its early hot weather shades of green. Death has robbed it of not a few old familiar forms and die back leaves gaunt and leafless branches on specimens one would fain think of as garden permanencies, but recent additions are springing up, and the garden is much richer so far as species is concerned than it was only a few years ago. For additions we have to thank a worldwide range of botanic gardens and institutions, but our nearest neighbours in India, Ceylon, Java and the Malay Peninsula are our best friends, and as plants native in these countries find the not dissimilar climate of Calcutta all that is necessary for their development, it is to our advantage to maintain the most intimate exchange relations with them.

No fewer than 150 species of plants unrepresented in the permanent collections in the open, in the shade houses or in the nurseries were added to the Royal Botanic Garden during the year, and a few suitable additions were made to the gardens in Calcutta from plants and seeds received in exchange by the head office at Sibpur.

As a public resort with its now well-kept lawns, its shady nooks and pleasant vistas, the garden merits the popularity its throngs of visitors prove it to have, but from the point of view of species it lags behind, if not in the excellence of individual examples, then in numbers contained and the 150 odd additions represent the year's attempt to make good this deficiency. It is extraordinary how trees and shrubs common throughout a province may in the course of time go missing from its gardens and parks, and an analysis at Sibpur shows how easy it has been to overlook plants with every claim to inclusion in the permanent lists.

Next to conserving the collections already established and rendering the garden more and more attractive from the visiting public's point of view, comes the importance of maintaining it as a repository for the largest possible number of South-east Asian species. To have these gardens in this respect twice as rich as they now are should not be difficult and is an aim constantly kept in sight. This year the most noteworthy additions belong to the palm and pine groups, the former mostly from gardens further to the South-east of Asia, the latter chiefly from Himalayan localities.

In a place the size of this expanse makes it inevitable that the proportional area under annual flower beds should be small, but a very successful attempt has been made this year to add some amount of colour by the staging of flowering groups in pots at suitable vantage points throughout the area. Thus the Oreodoxa Avenue afforded a blaze of colour to visitors entering the garden from the riverside, and the vicinity of the Orchid House and Kyd Monument similarly treated clearly proved the possibilities of this method for decorative purposes. Such cold weather grouping of annuals involves additional nursery work, but, until the pots are ready to go out, labour on them can be restricted by maintaining the stock near a water-supply, and the final effect enhanced by the elimination of those species or individuals that fail to reach a moderate standard of excellence. Moreover, in comparison with the permanent bed, the method gains by allowing rearrangements and regroupings of species to be carried out at any time.

Some 46 new Rose beds, the development of which culture has been rather a feature of the garden since the present Curator took over charge, were made and planted out with stock received from Upper India. Roses do not thrive well at Sibpur but, as with Orchids, a fair show is always possible by the importation of fresh stock and by concentration on those strains most resistant to extremes of climate.

A few additions were made to the living collections of medicinal plants and the students' section is now a well-established, and, to judge by the number of visitors who pore over it, an interesting and appreciated feature of the garden.

Amongst the more interesting horticultural operations may be mentioned the attempted establishment of temperate fruit trees and varieties of Camelias. With the latter there is already some evidence that success may be expected, but it is too early yet to speak of the former.

A small tank, the temperature of which can be regulated, has been constructed for the propagation and hybridization of water lilies. Quite a fair stock of different varieties has been accumulated and it is hoped to work up a quantity sufficient to allow of transplantation to the garden lakes.

The work of renewing and adding to the garden labels has gone on steadily and notes are in preparation for a series of special descriptive labels to be hung on the more important species. The last attempt made at this form of garden improvement had to be abandoned on account of wilful destruction of the label coverings. On this occasion stocks of labels will be printed off and glass slides laid in with a view to the immediate replacement of destroyed covers, and continuance of the improvement will depend on how repeatedly we have to make those replacements. With the transfer of road and river bank maintenance to the Public Works Department still in abeyance no major garden improvements could be thought of.

Schemes of garden improvement which have received administrative sanction and await the voting of funds include the provision of new coolie quarters, the sinking of a tube-well for the supply of drinking water for the public, the completion of revetment of the river bank and the thorough repair of all the garden roads.

2. **Plant and seed exchange.**—Records show some 3,360 plants as having been received and 26,128 distributed. As in former years the recipients were Government institutions, District Boards, Municipalities and Railways.

The reference made in last year's report to the class of Mahogany possible of culture at Sibpur resulted in an unusually large number of requests for seed or plants of this tree. As the seed does not keep well it had all been distributed before these requests arrived, and the best that could be done was to register applicants for a supply when fresh consignments could be received from the West Indies. These consignments continue to arrive yearly and make up for the deficiency in locally produced seed. The poorer grade of Mahogany fruits abundantly in Bengal but not the better kind.

Something under 500 packets of seeds were received from foreign correspondents and 422 distributed to various gardens, scientific departments and private individuals throughout the world.

3. **Herbarium and Library.**—The usual numbers of specimens were received, identified and incorporated and with the Herbarium and Survey staff now at its full sanctioned strength, a definite beginning has again been made to depute officers for periods of regular field survey work. Mr. Narayanaswami, First Assistant in the Survey, has brought back a large collection from a little known region north of the Kalar river in Travancore. Mr. Biswas, Curator of the Herbarium, has had several short tours in the Salt Lakes, 24-Parganas, Bengal, and Mr. Srinivasan will return to the Garo Hills for further survey and ecological work at an early date. The materials from these areas are at present being worked out and already promise new or rare plants or the extension of the hitherto supposed geographical limits of plants known elsewhere in the Peninsula.

In connection with the identity of seed collected for distribution from the Eastern Himalaya, considerable numbers of plants were examined for Mr. Leslie, Curator of the Lloyd Botanic Garden, Darjeeling.

In addition to the collections made departmentally accessions to the Herbarium include some 1,000 sheets returned after revision for the Flora of Madras, and a somewhat smaller number of Forestian duplicates from the Royal Botanic Garden, Edinburgh. Accompanying the latter was a large number of Nepal specimens including representatives of the genus Primula on which so much work has been done at Edinburgh of recent years. The gift is a welcome addition to Herbarium. During his Cinchona tours in Burma, the writer took occasion to add to the collections from the New Mergui Reserve area by bringing back some 350 specimens.

Besides South Indian material to Kew specimens on loan include all the material of the genus Gnetum to Prof. Markgraf of Berlin, the genus Nyssa to Mr. R. N. Parker and the genus Congea for taxonomic research at Peradeniya. The Sorghums also have gone to Kew, partly on loan for revision and partly to be retained on exchange account.

In common with other departments, the Library started receiving its supplies of books through local firms. Apart from periodicals, a very limited number of books only was purchased, library funds being diverted as far as possible to financing the plates for the forthcoming volume on the Asiatic Palms.

4. **Publications.**—No purely garden publications appeared during the year but final printing orders have issued for the Trees of Northern Bengal, and all the plates of Asiatic Palms in charge of Prof. Martelli have now been prepared and paid for. The letter press of this work, which is in its last proof, will be ready for the plates as soon as they arrive in India. The way is, therefore, now clear for the next Annals monograph—Sir David Prain and Mr. Burkill's work on the Asiatic Dioscoreas. The estimate for the plates part of this work given by Messrs. Spottiswoode Ballantyne & Co. has been accepted. Of Survey publications, Dr. Cowan's Ecological account of the Forests of Kalimpong is under distribution and next awaiting the Records is Dr. Bruhl's voluminous census of Indian Mosses.

5. **Finance.**—Out of a total budget allotment of Rs. 51,349 for staff and permanent establishment Rs. 50,116-7 were spent. Rupees 1,200 were surrendered under clerical establishment and garden staff and there was a small final saving of Rs. 32-9. Under all other heads there was a net saving of Rs. 720-6-11 out of a total grant of Rs. 65,214 after a surrender under travelling allowance and house rent and other allowances of Rs. 680. The total net saving was Rs. 752-15-11, the major portion of which is to be accounted for by the difficulty of exactly estimating for Europe stores. From the sale of miscellaneous garden products Rs. 933-2-3 were received and paid into the treasury.

6. **Staff.**—The writer held charge as Superintendent. Mr. Biswas was Curator of the Herbarium, Mr. Mitra, Curator, and Mr. Jones, Assistant Curator, of the garden. These two officers were confirmed in their respective appointments with effect from the 19th July 1927. Mr. Joneja was confirmed in his post of Overseer with effect from the 28th July 1928. Babu Ashutosh Banerji was Head Clerk throughout the year. All subordinate officers and the clerical establishment have performed their duties satisfactorily.

CALCUTTA GARDENS.

Work in these gardens was again mainly of a routine character. The show of flowering annuals was up to its usual standard of excellence and stocks of foliage plants such as ferns and potted palms were multiplied for decorative purposes and for loan to outside public or semi-public functions.

Certain areas of roadway received special attention but at best the grants made for these gardens allow of only ordinary surface repairs and are insufficient to meet the heavier expenditure that becomes necessary when roads require the more serious operation of resoleing to bring them back to condition.

The proper excavation of the tanks is a large and expensive scheme that cannot be delayed much longer. When tanks silt up till they become shallow enough for certain weeds to develop on the bottom, the expense of their repeated clearing becomes heavier than the occasional operation of emptying and deepening them. For many years both these and the Royal Botanic Gardens at Sibpur have been living on capital so far as the value of their tanks is concerned. Complaint has been received of late that the boating facilities in the Eden Garden are impaired through silting and weeds. This brings the need for their excavation to notice, but also reminds one that tanks which are allowed by silting to get into quagmire conditions, are as unhealthy as they are unsightly, and that public health interests too are involved in further capital expenditure on them.

Mr. Basu was, under the Curator, officer in immediate charge and Mr. Quasem Ali, his assistant, Overseer throughout the year. Out of a total allotment of Rs. 24,209, there was a saving of Rs. 301, effected mostly under Europe stores. Rupees 138 were obtained in the Dalhousie Square Section by the issue of fishing passes and paid into the treasury.

LLOYD BOTANIC GARDEN, DARJEELING.

The season in Darjeeling varied little from normal. Rainfall records show 91·27 inches. There was no snow but frost was continuous at nights during the winter. In March 1929, there were two heavy falls of hail which did some destruction to the annuals in the flower beds and damaged outside plants. Garden roads were all given surface repairs and improvements to the durwans' shelters, the propagating house and its staging and the lower lake made. All the glass houses were repainted and fine mesh wire-netting obtained through the stores department to protect the glass from hail.

Seeds of annuals obtained from Messrs. Carter and Co. and Watkins and Simpson gave good results as did also bulbs received from Holland. One hundred and seventy young trees and shrubs were planted out in the garden to replace deaths and as new species.

Mr. Leslie, who has been in charge throughout the year, continues in a very efficient manner the special seed and plant collection work through which his predecessor in office had given the garden a world-wide reputation. The collection work has suffered somewhat this year due to audit objections to the pay of the plant collectors and seed house boy. In consequence of these objections we have lost trained services difficult of replacement. Nevertheless the following seeds and plants were distributed to botanical and other institutions during the year: seeds 871 packets, plants 750; seedlings 2,200, and 517 packets of seeds and 521 plants were received. According to the gatekeepers' registers 39,261 persons visited the garden during the year.

Out of a sanctioned allotment of Rs. 21,719 for all heads, Rs. 21,112-12-2 were spent. A decision not to enter the market against local firms dealing in plants was reached during the year and there was no garden revenue.

PROVINCIAL BANKING ENQUIRY COMMITTEE, BENGAL.

NOTIFICATION.

No. 263B.E.C.—20th September 1929.—The following questionnaire of the Bengal Banking Enquiry Committee is published for general information.

J. C. CHAUDHURI,

Secy., Provl. Banking Enquiry Committee, Bengal.

QUESTIONNAIRE OF THE BENGAL PROVINCIAL BANKING ENQUIRY COMMITTEE.

(NOTE.—The following memorandum is published in order to assist witnesses in the preparation of their evidence. It is not to be regarded as exhaustive, nor is it desired that each witness should necessarily attempt to deal with all the questions raised.)

I.—Agricultural credit and credit facilities for small industries.

1. (*i*) Describe the present system by which the agriculturist in your district or province obtains finance—

(*a*) for expenses during cultivation,

(*b*) for capital and permanent improvements, and

(*c*) for other special needs, e.g., failure of monsoon, for land revenue, *rent*, etc.

(*ii*) What are the rates of interest charged in your district or province in respect of advances, the period for which loans are taken, the nature of the security given and accepted (e.g., standing crops, etc.), and other conditions attaching to the grant of such loans?

What in your estimate are the percentages of secured and unsecured loans to the agriculturists in your part of the country?

(*iii*) Describe the part played in agricultural finance by Government, the Imperial Bank of India, the Joint Stock Banks, Co-operative Banks, the Indigenous Banks and bankers, professional money-lenders, merchants and dealers, and other organisations giving credit (e.g., companies trading in fertilisers, etc.).

(*iv*) Can you give an estimate of the total amount of capital required for the various purposes stated above for your district or province?

(*v*) State defects, if any, in the present system of financing agriculture, and the reasons for the existence of such defects. Do you suggest any remedies?

(*vi*) Is there co-ordination among the various credit agencies including Government, and is there scope for improvement in that direction?

2. (*i*) Describe the present method of marketing principal crops in your district or province *by the raiyat.*

Is he unable to hold up his crop for a better price? If so, for what reasons.

(*ii*) What in your opinion are the possibilities of forming pools and of co-operative effort generally in marketing produce?

(*iii*) *Are there any co-operative sale societies in your district? How are they constituted? Are they linked to any central organisation? How are they financed at present? Do they experience any difficulty in obtaining sufficient funds?*

(*iv*) Describe the credit facilities required for the financing of products during marketing and the facilities actually existing.

(*v*) In regard to such facilities, is there any special difference as between internal trade and foreign trade?

(*vi*) What is the part played by the different classes of banks and bankers and merchants and dealers in the financing of—

(*a*) *the export trade from the village to the ports of the province through hâts, mokams, etc., and*

(*b*) *the import trade from these ports to the distributing centres and ultimately to the consumer?*

(*vi-a*) *What are the terms on which the financing of trade during the above stages is done? Are any difficulties experienced in connection with the above financing, and have you any suggestions to*

make for removing those difficulties and for improving in any way the existing financial facilities available for the movement of imported and exportable articles?

(*vi-b*) *It has been suggested that the grower of produce in India does not get the full value for his produce on account of the speculative buying and selling activities of firms and companies who deal in the export trade and on account of the control of prices by these and other bodies. What are your views on this suggestion? Please supplement your views by any facts and figures within your knowledge. Have you any observations to make with a view to ensure a better return to the growers of produce in India?*

(*vii*) *Have you any reason to think that the lack of banking facilities to persons engaged in the movement of the principal crops of your district (such as paddy and jute) is due to causes other than borrowers' lack of credit, e.g., any position of monopoly which the buyers might enjoy or to the want of a definite standard of quality?*

(*viii*) What are the existing facilities available to the public, including banks and bankers, for internal remittance?

(*ix*) State any defects in the existing system and any suggestions for improvement?

(*x*) Describe the part played by negotiable instruments in the internal trade of the province.

(*xi*) Have you any suggestions to make for the more extensive use of bills (e.g., by reduction of duty on bills)?

(*xii*) What are the different classes of hundis current in your part of the country? What are the peculiarities of each?

(*xiii*) *Will the introduction of standardised forms on stamped paper facilitate the use of hundis?*

(*xiv*) Have you any suggestions for the amendment of the Negotiable Instruments Act, by which the public and the bankers handling hundis might be better protected or benefited?

(*xv*) Are hundis emanating from your locality discounted in your local centre or are they sent to a provincial centre and discounted there, or are they held by middlemen, merchants or commission agents?

(*xvi*) *Are there any facilities for rediscounting hundis in your locality? If not, can you suggest means for the introduction of such facilities?*

(*xvii*) What different kinds of instruments of ownership of goods and produce (e.g., railway receipts) and documents are employed for raising money during the process of marketing?

(*xviii*) Are any difficulties experienced in the use of these instruments, *for instance, bills of lading issued by particular Inland Steamship Navigation Companies*, and have you any suggestions to make with a view to removing those difficulties?

(*xix*) What in your opinion are the possibilities of operating licensed warehouses in India either on the lines of the system which exists in the United States of America or otherwise?

(*xx*) Do you think there is any need for Government assistance in the matter?

3. (*i*) In your district, what is the value of land per acre for different kinds of crops?

(*ii*) What are the factors affecting such value? In your reply, please distinguish between—

(*a*) value of land in Government auction for non-payment of revenue,

(*b*) value of land in the event of sale by court decree; and

(*c*) value of land in purchase by private negotiation.

4. (*i*) Is there any legal impediment to mortgage of land and agricultural holdings in your province?

(*ii*) *How far has the amended Bengal Tenancy Act influenced the credit of the agriculturists?*

(*iii*) *To what extent do the smallness and fragmentation of the agricultural holdings stand in the way of establishing long term credit institutions?*

(*iv*) Are there any land mortgage banks or agricultural banks in your province or any other banks for the provision of long term credit?

(*v*) State what you know of their method of work and of raising capital.

(*vi*) If no such institution exists in the province, suggest the lines on which such institutions could be established and worked to the advantages of the landholders and tenants of your province.

(*vii*) Do you suggest any measures for—

(*a*) improvement in the record-of-rights and title of ownership so as to simplify reference, and to avoid possibilities of disputes and counter-claims by parties other than those who are the clients of the bank;

(*b*) simplification of the process of foreclosure and sale by the Mortgage Bank in the event of non-payment; and

(*c*) reduction of costs of reference to the record-of-rights and of registration of records and of the process at law, so as to reduce the burden on the good constituents of the bank in respect of charges incurred on account of defaulters?

(*viii*) Should the working capital of the proposed Mortgage Bank be derived largely from—

(*a*) deposits,

(*b*) funds from central institutions, or

(*c*) debenture bonds?

(*ix*) Should debenture bonds carry any Government guarantee either for principal or interest, or for both?

(*x*) If so, what measures would you suggest to secure Government against unnecessary loss?

(*xi*) On what terms should Agricultural Mortgage Banks raise moneys under each of the above-mentioned heads, with or without Government guarantee, and on what terms should they lend out money so as to cover their expenses?

(*xii*) *Do you consider that the debentures to be issued by the proposed Co-operative Land Mortgage Banks should be included in the list of trustee securities?*

(*xiii*) Please state any other suggestions for the adequate provision of long term credit against sound security.

5. In order to devise measures for the increase of credit facilities to the agricultural classes, it is necessary to reach an estimate as accurate as possible of the existing indebtedness of these classes.

(*i*) Do you know of any such estimate for a village or a district in your province, or for the whole province?

(*ii*) In what manner can such an estimate be obtained with reasonable accuracy?

(*iii*) In such an estimate please distinguish between—

(*a*) the amount of debt with land as security which is in the form of a registered mortgage; and

(*b*) the amount of debt which is incurred against any other assets, such as the village house, ornaments, ploughs and other agricultural implements, crops and produce, or debt which is given on the general security of all the assets without a specific pledge.

(*iv*) Please state wherever possible the purposes for which the debt was incurred, such as—

(*a*) the repayment of earlier debts,

(*b*) marriage and other social occasions,

(*c*) *litigation,*

(*d*) famine and other kinds of distress,

(*e*) payment of land revenue *or rent,*

(*f*) growth of the debt by compound interest, interest not having been paid,

(*g*) cattle, seeds and manure,

(*h*) improved agricultural implements, or

(*i*) sinking of wells and agricultural improvements.

(*v*) Please indicate also to whom this debt is largely due and whether the creditors are Government, banks, co-operative societies, or indigenous bankers and professional money-lenders.

(*vi*) *Is agricultural indebtedness in your locality increasing or decreasing?*

(*vii*) *How far are the needs of the agriculturists of your part of the country met at present by the Land Improvements Loans Act of 1883 and the Agriculturists' Loans Act of 1884?*

(*viii*) *Can you suggest any measures for rendering the operations of these Acts more prompt?*

(*ix*) *Are itinerant money-lenders, such as Kabulis, to be found in your part of the country? Describe their method of work?*

(*x*) *Can you give some concrete instances of usurious rates of interest, heavy accumulation of debts, and prolonged duration of a loan, in cash or in kind?*

(*xi*) *To what extent is the Usurious Loans Act (Act X of 1918) availed of in your locality? What measures would you suggest for greater use being made thereof?*

(*xii*) *Is there any standard rate of interest followed by courts for (a) unsecured and (b) secured loans in applying the Act?*

DEPARTMENT OF AGRICULTURE, BENGAL.

Monthly Weather and Crop Report of Bengal for August 1929.

I. **Character of the season.**—During the month under review, the rainfall was above the normal in the districts of Bankura, Midnapore, Howrah, Darjeeling and Bakarganj and in the Tripura State; elsewhere it was below the average. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of autumn paddy and cutting, steeping and washing of jute were proceeding but want of sufficient water for steeping was felt in places of West and North Bengal. Transplantation of winter paddy seedlings was much advanced during the course of the month.

III. **State of standing crops.**—The outlook of standing crops was reported to be promising on the whole.

IV. **Prospects and probable outturn.**—The prospects of standing crops were generally fair. The outturn of sugarcane is expected to be fairly satisfactory.

V. **Damage to standing crops.**—Except for damage caused by insect-pests in some districts, no injury to crops was reported from any part of the province.

VI. **Condition of agricultural stock.**—The condition of live-stock was, on the whole, fair. Sporadic cases of cattle-disease were, however, reported from nine districts.

VII. **Failure of pasturage and fodder.**—No insufficiency of fodder was reported from any part of the province.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the retail price of common rice of the cheapest quality rose in four districts, fell in ten, and remained stationary in the rest of the Presidency. It varied from 5½ seers per rupee at Jalpaiguri to 8 seers per rupee at Malda and Chittagong.

IX. **Condition of agricultural population.**—The condition of agricultural population was, on the whole, fair, except in areas affected by flood.
